

Your natural choice...

Quality Paper from China without diversions **from producer to printer**

Van Eeghen International Paper b.v.

Est. 1662

Printing on quality paper without ado

Good print work is carried by good paper. It feels good to the printer, on the press and finally in the hands of the reader. In addition it is delivered just in time, well cut and can be converted without any problems. The paper is also easy to order and arrives at the printer's doorstep without any diversions. For that kind of paper Van Eeghen International Paper is your natural choice...

Van Eeghen International Paper

Van Eeghen International Paper BV imports and distributes quality paper from China, meant for the offset printers in The Netherlands and other countries in Western Europe. Through a carefully thought-out concept high quality, direct service and distribution are all well combined.

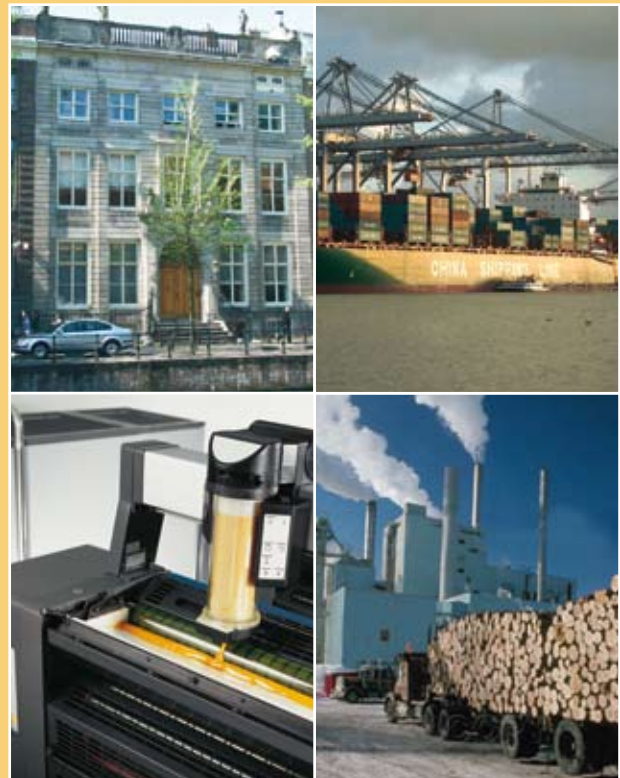

Your natural choice...

Van Eeghen International Paper BV is part of the Van Eeghen Group. The group finds its roots in 1662 when Van Eeghen started the importation of products from the Far East. The company has steadily grown into a reliable, strong internationally oriented enterprise, specialised in product know-how, procurement, logistics and distribution. This is amplified through a strong concentration on quality products, local market know-how and simplicity of supply and working methods. The motto is 'Your natural choice...'

Chenming Paper Group

The paper comes from the Chenming Paper Group – a listed paper company in China with 9 production locations and some 20.000 employees. They employ state-of-the art machinery that produce along international norms. The yearly production encompasses 3.5 million tons of paper and board. The ambition is, in 2010, to be amongst the 10 largest producers in the world with a production of some 6 million tons per year, with activities in Asia, the US and Europe.

Central in their corporate vision is to have clearly defined environmental targets. The group is FSC and ISO 14001 certified. The pulp is produced from special production forests, bleached through the use of water peroxide and advanced water purification plants assure the recycling of chemicals. The production process is organised according to ISO 9001. An important differentiating advantage of the paper is that it has high stiffness and bulk, which may be up to 20% better than the competition.

*'Top-quality combined with
direct service and distribution'*

Quality AND financial advantage

Van Eeghen International BV distinguishes itself through cost savings in the distribution of paper through:

- Close cooperation with the producer who is able to be flexible.
- A well thought out logistics model, close to the producer and without unnecessary steps.
- The possibility to fulfil orders through the internet.
- Focus on a number of standard sheet sizes and grammages in coated fine paper, matt and gloss.
- Delivery of non standard sheet sizes and grammages possible through mutual agreement.

All this delivers considerable financial advantage to the end-user, while keeping the optimal quality...
